

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	10 September 2026
Team ID	SWUID2026191972
Project Name	Medical Diagnosis Center by Service Portal (ServiceNow)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming is the first step in identifying and selecting the best solution for a real-world problem. Our team discussed different healthcare challenges faced in medical diagnosis centers and generated multiple ideas to improve patient services and hospital operations.

After discussing all ideas, we prioritized the most useful and feasible solution based on its importance, feasibility, and real-world impact. We selected the Medical Diagnosis Center by Service Portal (ServiceNow) because it provides a centralized platform for patient registration, diagnostic test booking, appointment scheduling, report management, payment tracking, and workflow automation.

This brainstorming session helped the team identify the project scope, required features, and implementation plan for the Medical Diagnosis Center application.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement

Medical Diagnosis Centers still use manual processes for patient registration, appointment booking, report collection, and payment management. This causes long waiting times, duplicate bookings, paperwork, delayed reports, and poor communication between patients and lab staff.

Why We Selected This Problem

- Patients spend time waiting for appointments.
- Booking conflicts happen because slots are managed manually.
- Reports are collected physically.
- Payment tracking is difficult.
- Hospital staff maintain multiple paper records.

Project Goal

Develop a ServiceNow Service Portal that allows patients to register, book diagnostic tests, track appointment status, download reports, and make payments online while helping lab staff manage appointments efficiently.

Team Collaboration

Our team discussed different healthcare problems and selected the Medical Diagnosis Center because it solves real-world hospital management issues using ServiceNow automation.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm Ideas

S.No	Brainstorm Idea	Purpose / Description
1	Online Patient Registration	Patients can register through the Service Portal.
2	Diagnostic Test Booking	Patients can book Blood Test, MRI, CT Scan, X-Ray, etc.
3	Appointment Slot Selection	Patients choose available date and time slots.
4	Real-Time Slot Validation	Prevent duplicate or overlapping bookings.
5	Automated Approval Workflow	Special tests require Lab Manager approval.
6	Diagnostic Report Management	Upload and download reports digitally.
7	Email Notifications	Send booking confirmation and report availability emails.
8	Online Payment & Invoice	Patients pay online and receive invoices.
9	Admin Dashboard	Admin monitors appointments, reports, payments, and revenue.
10	Role-Based Access Control	Separate access for Patient, Lab Technician, Receptionist, and Admin.

Idea Grouping

Idea Group	Features Included
Patient Services	Patient Registration, Test Booking, Appointment Tracking, Report Download
Lab Operations	Sample Collection, Test Processing, Report Upload, Approval Workflow
Payment Management	Online Payment, Invoice Generation, Payment Status, Refund Tracking
Administration	Admin Dashboard, Revenue Reports, User Management, Email Notifications

Step-3: Idea Prioritization

Priority Table

Idea / Feature	Importance	Feasibility	Priority
Patient Registration	High	High	High Priority
Diagnostic Test Booking	High	High	High Priority
Appointment Slot Validation	High	High	High Priority
Workflow Automation	High	Medium	High Priority
Report Upload & Download	High	High	High Priority
Email Notifications	High	High	High Priority
Online Payment	Medium	Medium	Medium Priority
Refund Management	Medium	Medium	Medium Priority
Admin Dashboard & Analytics	Medium	Medium	Medium Priority
Revenue Reporting	Medium	Medium	Medium Priority
