

Planning Logic

A Sprint is a fixed time period in which the development team completes a group of user stories.

An Epic is a major feature of the project. Each Epic is divided into smaller User Stories (USN).

A User Story is a small task that delivers one feature of the application.

A Story Point represents the effort required to complete a user story.

Story point

Story Point	Effort Level
1	Very Easy Task
2	Easy Task
3	Moderate Task
5	Difficult Task

Sprint 1

Epic 1 – Patient Registration & Service Portal Setup

User Story	Story Points
USN-1-Create Patient Registration Page	2
USN-2-Patient Login & Profile Setup	2
USN-3-Create Diagnostic Test Catalog	3

Epic 2 – Appointment Booking

User Story	Story Points
USN-4 – Book Diagnostic Test	3
USN-5 – Select Appointment Date & Time Slot	2
USN-6 – Validate Mandatory Fields	2

Total Story Point in Sprint 1 = 2+2+3+3+2+2 = 14

Sprint 2

Epic 3 – Booking Validation & Workflow

User Story	Story Points
USN-7 – Real-Time Slot Validation	3
USN-8 – Prevent Duplicate Bookings	3
USN-9 – Appointment Approval Workflow	5

Epic 4 – Report Management

User Story	Story Points
USN-10 – Upload Diagnostic Report	3
USN-11 – Patient View & Download Report	2

Total story Point in Sprint 2= 3+3+5+3+2=16

Sprint 3

Epic 5 – Payment & Notifications

User Story	Story Points
USN-12 – Automatic Fee Calculation	3
USN-13 – Payment Status Tracking	3
USN-14 – Email Notification Templates	2

Epic 6 – Admin Dashboard

User Story	Story Points
USN-15 – Dashboard for Appointments & Payments	5
USN-16 – Role-Based Access Control	3

Total Story Points in Sprint 3

$$3 + 3 + 2 + 5 + 3 = 16$$

Total Story Points

Sprint	Story Points
Sprint 1	14
Sprint 2	16
Sprint 3	16

Total Story Points = 46

Velocity= Total Story Points Completed/ Number of Sprints

Total story Points= 46

No of Sprints= 3

Velocity =46/3

15.33(Story Points per Sprint)

Your team's velocity is 15 Story Points per Sprint.
